Summary

AI/ML graduate specializing in **Python-based machine learning systems**, **deep learning pipelines**, and **LLM-powered applications**. Hands-on experience building **AI chatbots with Google Gemini API**, end-to-end **ETL pipelines**, and **CNN/LSTM models** on large-scale datasets. Eager to apply AI/ML expertise to deliver impactful, production-grade solutions in a collaborative engineering environment.

Technical Skills

- **Languages:** Python, SQL
- **AI / ML:** Machine Learning, Deep Learning, NLP, NLU, Large Language Models (LLM), Generative AI, RAG (Retrieval-Augmented Generation), AI Agents
- **Frameworks & Libraries:** TensorFlow, Scikit-learn, NumPy, Pandas, OpenCV, Matplotlib
- **Cloud & MLOps:** Google Cloud Platform (Gen AI, 5 Skill Badges), Google Gemini API, Git, CI/CD pipelines (basic), ML workflow automation
- **Data Engineering:** ETL pipelines, data preprocessing, data transformation, data validation, feature engineering
- **Databases:** MySQL, MongoDB
- **Deep Learning Architectures:** CNN, LSTM, image preprocessing, sequence modeling
- **Tools & Platforms:** Jupyter, Google Colab, Firebase, VS Code

Experience

AI/ML Intern
CODEXINTERN

April 2025 – October 2025
Hyderabad, India

- Enhanced AI voice-activated assistant with **NLP-based intent switching** across 8+ modules (WhatsApp automation, Wikipedia, YouTube, weather, news, email) and natural randomized responses.
- Built a **Gemini LLM assistant** with **conversational memory** (JSON history logs), web/image search, live data feeds, text-to-speech, and **graceful API fallback handling**.

Full Stack Developer Intern
ELiteTech Intern

December 2024 – January 2025
Remote

- Developed **3 production web applications** using React.js and JavaScript with structured data handling and REST API integration.
- Optimized frontend workflows and component rendering, **reducing load time by 25%** on deployed applications.

Projects

Plant Disease Detection (CNN) [Repo]

Python, TensorFlow, Keras, Plotly, Seaborn, Scikit-learn

- Built a **modular CNN pipeline** (train/test/main) on **70K+ images** with train/validation split, model saving, and real-time prediction on new images.
- Evaluated model using **confusion matrix, precision, recall & F1 score**; visualized performance with **Plotly and Seaborn**.

StockMentor – Stock Trend Predictor [Repo]

Python, Pandas, Matplotlib, LSTM, Tiingo API

- Built an **ETL pipeline** fetching real-time stock data via **Tiingo API**, stored as CSV/DataFrames with cleaning and **MinMaxScaler** normalization.
- Trained an **LSTM forecasting model** with train/test split; visualized historical vs. predicted trends and generated **multi-day forecasts (5–30 days)**.

Perfume Shop – MERN E-Commerce [Repo]

React, Node.js, MongoDB

- Architected and managed **MongoDB schemas** for efficient storage of transactional and user data at application scale.
- Performed **data extraction and analytics** on application data to support reporting, debugging, and business insights.

Education

Jawaharlal Nehru Technological University Hyderabad

B.Tech in Computer Science and Engineering – Specialization: AI & Machine Learning

2021 – 2025

CGPA: 7.44

Kendriya Vidyalaya Gachibowli

Higher Secondary (CBSE)

2019 – 2021

CGPA: 8.2

Certifications & Achievements

- **Google Cloud Gen AI Program:** 5 Skill Badges – Generative AI, Prompt Design, Responsible AI, Transformer Models, Vector Search
- **Infosys Springboard:** Generative AI Certification (2025)
- **NPTEL:** Qualified – Python for Data Science
- **Udemy:** Machine Learning A-Z, Python Bootcamp, Full Stack Development
- **Hackathon:** **1st Prize** – Mind Plug Fiesta (National Level)

Soft Skills

- Analytical Thinking, Problem-Solving, Communication, Adaptability, Teamwork, Creativity
