Summary

B.Tech Computer Science graduate specializing in AI & ML with hands-on experience in machine learning, deep learning, data analytics, and end-to-end AI application development. Experienced in Python, SQL, TensorFlow, Scikit-learn, Power BI, and Flask, with projects spanning computer vision, healthcare AI, time-series forecasting, and business analytics.

Technical Skills

- **Languages:** Python, SQL
- **Machine Learning & AI:** Supervised Learning, Unsupervised Learning, CNN, LSTM, NLP, Time-Series Forecasting, Feature Engineering, Model Evaluation
- **Libraries & Frameworks:** TensorFlow, Keras, Scikit-learn, Pandas, NumPy, OpenCV, Flask, Matplotlib, Seaborn
- **Data & Visualization:** EDA, Data Cleaning, KPI Generation, Power BI, Excel, Chart.js
- **Databases & Deployment:** MySQL, MongoDB, SQLite, Firebase, REST APIs, Docker, Render
- **Tools & Cloud:** Git, GitHub, Jupyter Notebook, VS Code, Google Cloud, Gemini API, OpenAI API

Experience

Data Science Intern
Amdocs Technologies

April 2026 – Present
Hyderabad, India

- Processed and analysed 1M+ records from the UCI Online Retail II dataset using Python, Pandas, and NumPy; performed data cleaning, feature engineering, and KPI generation.
- Built interactive Power BI dashboards for sales trends, customer analytics, product performance, and business reporting.
- Developed MediVerse AI, a Flask-based healthcare recommendation system integrating ML disease prediction, confidence scoring, recommendation workflows, analytics, and role-based admin access.

AI/ML Research Intern
IIT Ranchi

May 2026 – Present
Remote

- Working on computer vision research focused on deep learning-based plant disease classification and improving model generalisation.
- Exploring transfer learning and explainable AI techniques for interpretable image classification and research-oriented model evaluation.

AI/ML Intern
CodexIntern

April 2025 – October 2025
Hyderabad, India

- Built an NLP-based voice assistant integrating WhatsApp, YouTube, weather, and email services through intent-driven automation.
- Developed a multi-turn Gemini API chatbot with conversation memory, structured logging, and fallback handling.

Freelance ML Engineer
Client Project (Confidential)

May 2024 – December 2024
Hyderabad, India

- Developed an end-to-end CNN-based crop disease classification pipeline using 70K+ labelled images, achieving 90%+ validation accuracy.
- Handled image preprocessing, augmentation, class balancing, model training, evaluation, and deployment workflow independently.

Projects

Plant Disease Detection [Repo]

Python, TensorFlow, CNN, OpenCV

- Built a CNN-based image classification system for crop disease detection across 38 classes, achieving **90%+ validation accuracy** on 70K+ labeled images.
- Applied image augmentation and class balancing to improve generalisation and achieved consistent per-class precision and recall above 0.90.

MediVerse AI [Repo]

Python, Flask, Scikit-learn, SQLAlchemy

- Developed an ML-powered healthcare system for symptom-based disease prediction, confidence scoring, medicine recommendations, and prediction history.

- Built Flask authentication, analytics dashboards, admin access, and PDF/Excel report exports with a modular application architecture.
- StockMentor [Repo]

Python, LSTM, TensorFlow, Power BI
- Built an LSTM-based stock forecasting pipeline using 5 years of historical market data fetched through the Tiingo API with a 100-day lookback window.
 - Generated user-defined price forecasts and visualised trends, volatility, and predicted vs. actual movement through interactive Power BI dashboards.

Education

Jawaharlal Nehru Technological University Hyderabad	2021 – 2025
B.Tech – Computer Science and Engineering (AI & ML Specialization)	<i>CGPA: 7.44</i>
Kendriya Vidyalaya Gachibowli	2019 – 2021
Higher Secondary (CBSE)	<i>CGPA: 8.2</i>

Certifications & Achievements

- **1st Place – Mind Plug Fiesta National-Level Hackathon** for StockMentor, an LSTM-based stock forecasting and Power BI analytics system.
- Google Cloud GenAI Programme – 5 Skill Badges | Infosys Springboard – Generative AI (2025) | NPTEL – Python for Data Science
